

Radiology Imaging Collaboration Office (RICO)

Research Fee Schedule

Administrative Fees			
Level of Support	Modality Services Included	Price	Frequency
Tier 1: Simple	Single Modality: Feasibility Review, X-Ray, Ultrasound	\$ 950	One-time fee billed at study startup
Tier 2: Moderate	Single Modality: CT	\$ 1,800	
Tier 3: Complex	Single Modality: IR, MRI, Nuclear Medicine, ALL MULTI-MODALITY STUDIES	\$ 2,500	
Amendment Fee	All Tiers	\$ 750.00	Billed as needed during the lifecycle of the study
<p>All Tiers include the following:</p> <ul style="list-style-type: none"> Imaging Proposal Review by Medical Imaging Research Committee Equipment software and hardware information provided upon request Site Initiation Visit attendance upon request Imaging Budget Development Specific Research Order Development Review and confirmation of appropriate billing with Revenue Integrity Guidance with coordination and scheduling of services 			
<p>**Tier assignments are based on information and documents provided to Research Committee at time of submission. Additional information or requirements provided by study team may require a revised budget.</p>			
Additional Support Services			
Activity	Description	Price	Frequency
*Imaging Protocol Build	Creating custom acquisition, analyses or data-manipulation, protocol optimization that may be non-standard and time-intensive, and/or study-related analysis software or oversight of minor equipment installation.	\$630 per build	Additional support services will be billed as needed during the lifecycle of the study.
*Medical Imaging Personnel Training	Some industry studies require training of medical imaging personnel for study initiation. This can be completed by quiz, webinar, on-site training. Charges are based on modality and category of training.	\$110 per hour	
*Phantom, Qualification, or Volunteer Scan	Some studies require phantom, qualification, or volunteer scans that must be performed for QA/QC purposes before a study is activated or continuously throughout the study cycle.	\$590 per scan	
Coordinator Support for MRI Volunteer Scan	Some studies require a healthy volunteer scan prior to study activation for quality certification of imaging modalities. RICO personnel will recruit, enroll, consent, and conduct the study visit for the healthy volunteer with the imaging technologists. The study team will be responsible for obtaining and submitting the images to the sponsor for certification.	\$170 per scan	
Research Analysis Report	Provides additional information regarding a research-related scan that is required for the research study or clinical trial but is not normally found in a standard radiologist report. This might include specialized interpretation requirements as well as consistent comparisons between baseline and follow-up scans	\$240 per hour	
<p>*RICO services will be billed via NUcore with the exception of support services marked with an * which will be billed via NM.</p>
