

Radiology Imaging Collaboration Office (RICO)

Research Fee Schedule

Administrative Fees			
Level of Support	Modality Services Included	Price	Frequency
Tier 1: Simple	Single Modality: Feasibility Review, X-Ray, Ultrasound	\$ 950	One-time fee billed at study startup
Tier 2: Moderate	Single Modality: CT	\$ 1,800	
Tier 3: Complex	Single Modality: IR, MRI, Nuclear Medicine, ALL MULTI-MODALITY STUDIES	\$ 2,500	
Amendment Fee	All Tiers	\$ 750.00	Billed as needed during the lifecycle of the study
<u>All Tiers include the following:</u> • Imaging Proposal Review by Medical Imaging Research Committee • Equipment software and hardware information provided upon request • Site Initiation Visit attendance upon request • Imaging Budget Development • Specific Research Order Development • Review and confirmation of appropriate billing with Revenue Integrity • Guidance with coordination and scheduling of services			
**Tier assignments are based on information and documents provided to Research Committee at time of submission. Additional information or requirements provided by study team may require a revised budget.			
Additional Support Services			
Activity	Description	Price	Frequency
*Imaging Protocol Build	Creating custom acquisition, analyses or data-manipulation, protocol optimization that may be non-standard and time-intensive, and/or study-related analysis software or oversight of minor equipment installation.	\$630 per build	Additional support services will be billed as needed during the lifecycle of the study.
*Medical Imaging Personnel Training	Some industry studies require training of medical imaging personnel for study initiation. This can be completed by quiz, webinar, on-site training. Charges are based on modality and category of training.	\$110 per hour	
*Qualification (Phantom) Scan	Some studies require a qualification, or phantom, scan that must be performed for QA/QC purposes before a study is activated or continuously throughout the study cycle.	\$590 per scan	
Research Analysis Report	Provides additional information regarding a research-related scan that is required for the research study or clinical trial but is not normally found in a standard radiologist report. This might include specialized interpretation requirements as well as consistent comparisons between baseline and follow-up scans	\$240 per hour	
*RICO services will be billed via NUcore with the exception of support services marked with an * which will be billed via NM.
